

It's All About Being *Noticed.*

Lights that make *daylight* recognition as noticeable as night-time recognition.

LoPresti HID BoomBeam™

LoPresti

- LoPresti HID BoomBeams have become the world's "recognized" leader in aviation lighting for several reasons:
- increased safety and visibility
 - longer lasting, daytime recognition (anyone can do it in the dark)
 - helps cut costs
 - proven record of over 250 STCs.

STC/PMA for Piper, Cessna, Cirrus, Grumman, Hawker/Beechcraft, Mooney, Diamond, the expanding LSA market, and many more.

Available Beam Widths

Intermediate: 17°
Landing: 9°

LoPresti HID BoomBeams Features:

- 15 years of dedicated development/production of HID's for aviation use
 - System produces less heat than stock
- Low amperage draw with increased light output
